1315 Marrabel Road, Kapunda SA 5373

Property Located 10km North of Kapunda on the Marrabel Road SA

www.maryvalestock.com.au

Welcome to our 2020 sale offering. The new decade will no doubt bring new challenges but most importantly let's hope it brings normal rainfalls. Extended drought, devastating fires and flooding rains are very challenging for agriculture and the beef industry but seem to be part of our great country's habits. Our stock water dams have mostly dried out and as a result we have been putting in new bores, tanks and pipes; this has taken a lot of time and effort and delayed sale preparation.

There has been some decent rainfall in some places for January and we hope it is a sign of things to come. The Gums are also flowering and bee keepers tell me that means rain is on its way. Hopefully it's time to start rebuilding the nation's beef breeding herd and we encourage you to use the best quality cattle available at reasonable prices. Maryvale is a great destination for high quality genetics at a very realistic prices. For 30 years the Maryvale herd has been accumulating marginal gains on every measurable trait, from both visual performance and recorded data selection. We believe this is what makes the cattle great. The cattle are improved each year from selection using figures and phenotype over as many generations as possible.

MV breeders March19 straight from the paddock after a tough summer of eating only straw

- We have spent hours searching the national and international genetics available in the Angus and Limousin breeds to bring these leading animals to this sale.
- We place selection criteria on every measurable trait being improved together with visual and physical performance.
- We have a system where the breeding herd is run under tough commercial conditions with very little supplement feeding; this enables us to select sound, strong, feed-efficient stock.
- We walk the breeders over 10km between properties in under two hours and that helps select for athleticism and structure.
- We handle the cattle in average infrastructure that helps us select for easy to work with, quiet animals.
- We replicate the important feedlot finishing industry by short term supplementing the sale bulls which helps select great finishing ability and structural soundness.

Due to the tough seasons and feed shortages the bulls have been on less feed for a shorter period so they are ready to work right after the sale. The 27 Angus bulls are young and keen, ready to start the job and acclimatise quickly. They are breed leaders in their genetic makeup. Both sire and dam were carefully selected for functionality from Australia's leading herds, the main one being Millah Murrah Angus whose bull sale averaged \$17,261- in Sept 2019. All the mothers of our sale bulls are fantastic animals, from calving ease to handling through the yards and overall type and data. All the sires are breed greats and highly valued within the industry. These bulls will certainly offer great opportunity to restock any herd with top genetics at awesome value.

We always bring the best Limousin genetics available to Maryvale and are excited to have purchased in March 2019 for \$15,000 Shannalea Naverone (insert pic) a black, homo polled bull whose mother Greenwood Wistera Lane is a great Limousin cow in Canada and his father Wulfs Xclusive one of the top Limousin bulls in USA.

Peter O'Neil's awesome MV sired vealers at 9m

It is exciting that the export market sees the value in Limousin cattle offering greater feed efficiency, hybrid vigour and more saleable red meat. It is also great that Limousin X Angus cattle were the most profitable in the gate to plate competition. At the Royal Adelaide Show we were pleased to have our steer described by an expert as one of the best steers in the shed! Then picking up Reserve Champion Export Steer on Hoof and second to the Reserve Champion Steer on the hook at 656kg, 126 eye muscle, 14mm P8, 10mm Rib. We also won the Peter Lintern Memorial Award for Breeder of the highest scoring School Steer on Hoof and Hook. Well done to Mt Compass Area School for your preparations and showing. This demonstrates how our cattle perform where it counts. The 21 Limousin bulls offered are certainly of a very high standard and genetic make up to get the job done.

To select this year's offering of the Maryvale Limousin females I decided to go into every section of the herd and select my favourite black animal and my favourite apricot animal from summer calving cows, from winter calving cows, from 3 in 1 cows, from spring calving heifers, from autumn calving heifers and baby Q drop heifers. We are so pleased with the type and quality of these animals that we will be more than happy for them to remain at Maryvale with appropriate reserve pricing to suit.

Rebekah Rushton fell in love with Limousin and particularly Maryvale genetics over the years as a junior showing at the Heifer shows and has now purchased her first Limousin heifer from us to commence her very own stud, Lakota Limousin. She has made a wise selection for a solid foundation to build her herd. We wish her success on her Limousin journey.

Thanks to all our valued clients who support us. 2019 sale highlights were:

- Top priced female to Kevin & Sue Nettleton of Unison \$12,000 for Maryvale Meringue M645 and her calf Maryvale Pavlova.
- Top priced bull at \$5500 to Michael Evans for Millah Murrah Hector N192.
- Volume buyer Nola Smith of Meadowbrook purchasing 4 lots including Maryvale Nola N784. The 2019 Sale average of \$4417 proves Maryvale offers exceptional buying opportunities, and we invite you to join the others whose eyes widen when viewing our cattle in the flesh and are very impressed with the even line up we present. ***We invite you to join us on 21/2/20. Refreshments will be provided.***

27 Angus Bulls 21 Limousin Bulls 12 Elite Female Lots

Sale Information – Nutrien & Landmark Beaton Agencies will be facilitating the sale for us by Auction with all cattle present onsite in holding pens for easy viewing, visitors can enter pens at their own risk. Please register with Nutrien prior to the start of the sale, or with Auctionsplus. Animals are sold exclusive of GST.

Phone Bidding – Key contacts (Interstate bidders please note we are on SA Central Standard Time)

Phone Bidding can be arranged in advance by contacting one of the following key contacts within Nutrien:

Greg Beaton – Landmark Beaton Agencies Kapunda SA – 0428 847 510 or 08-85662004

Gordon Wood – Nutrien Stud Stock – SA - 0408 813 215

Trevor Driver – Nutrien SA & NT Area Manager – 0428 241 049

Richard Miller – Nutrien SA – 0428 849 327

Ray Atwell – Nutrien Stud Stock – Melbourne – 0428 836 136

Peter Godbolt – Nutrien Stud Stock – Albury – 0457 591 929

John Settree – Nutrien Livestock Sales - NSW - 0408297368

Rebates to outside agents

We appreciate the strong support that has been shown to us by Nutrien and many other agents over the history of our stud. A 4% rebate will be made available to all outside agents purchasing stock at the sale of behalf of clients. Outside agents must introduce the clients to us in writing 24 hours before the start of the sale to be eligible for the 4% rebate.

Insurance

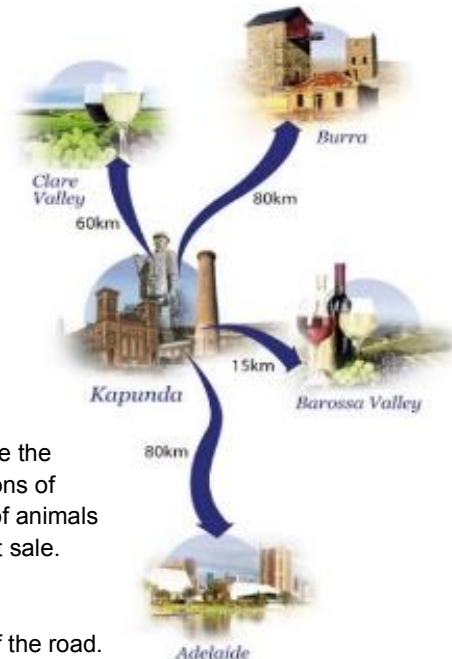

Animals will become the responsibility of the purchasers at the conclusion of the sale. We strongly recommend insuring your animals for a 3, 6, or 12 month period at the conclusion of the sale. Insurance can be arranged with Nutrien as required.

Freight & Travel

We are willing to hold animals for a reasonable period after the sale to enable purchasers to coordinate the successful and efficient transport of animals home to their properties. We can provide recommendations of suitable stud stock carriers and will assist wherever we can to ensure the safe and efficient transport of animals to your property. Please contact Matt Vogt on 0407 959 837 in regard to the freight and transport post sale.

Accommodation

Our property is located 10 kilometres North of Kapunda on the road to Marrabel on the Eastern side of the road. We are located approximately 1.5 hours North of the Adelaide Airport. The Kapunda airstrip adjoins our property and light planes are most welcome to use it. We will happily pick you up. We are located between the two small townships of Allendale North and Hamilton. Our property has a “Maryvale” sign on the main road. Accommodation is readily available in Kapunda (Kapunda Tourist Park 0885662094 www.kapundatouristpark.com is one of many options) and both the nearby Barossa (25kms from us) and Clare Valleys which are both very renowned areas of attraction.

EXPLANATION OF THE SUFFIXES TO ANIMAL NAMES IN THIS CATALOGUE

Horn Status: (HP*) Homozygous Polled by DNA test (which has an accuracy of 92%), (HP) Homozygous Polled by progeny test, (2P) Homozygous Polled by pedigree, (P) Polled, (S) Scurred.

Colour: (HB) DNA tested Homozygous Black, (2B) Homozygous Black by pedigree, (B) Black, (R) Red (not apricot).

Protoporphyrin Status: (PN) Proto Normal, (PF) Proto free by pedigree, (PC) the animal is a carrier of the abnormal gene for protoporphyria, (PS) Proto Suspect (parent of diseased animal), (PU) the animal has not been tested for protoporphyria or have parents which have been tested normal or are free by pedigree.

Homozygous: is the term where an animal has two copies of a particular gene (tested or pedigree) for a trait (colour, polled). An example is Homozygous polled where by all progeny will be polled from that particular animal or Homozygous black where all progeny will be black.

F94L: (AA) 2 copies, (AC) 1 copy, (2A) 2 copies by pedigree, (CC) no copies.

UNDERSTANDING EBVS

An Estimated Breeding Value (EBV) is an estimate of the genetic merit of that animal for each trait measured. EBVs are provided for the following traits:

Calving Ease (DIR) EBVs: are estimates of genetic differences in the ability of a sire's calves to be born unassisted from two year old heifers. The EBVs are reported as differences in the percentage of unassisted calvings.

Gestation Length EBV: this EBV ranks sires for the time between conception and the birth of a calf. Shorter gestation is indicated by negative EBVs and longer by positive EBVs.

Birth Weight EBV: this EBV indicates the genetic potential for birth weight. Positive EBVs indicate higher birth weights and negative EBVs indicate lower birth weights of progeny.

Milk EBV: an important component of fast growth to weaning is the dam's maternal performance. A bull with a high milk EBV should produce daughters which milk well.

200, 400 & 600 Day Weight EBVs: these EBVs give us an estimation of the animal's genetic potential for growth to the various ages.

Docility EBV: the docility EBV is expressed as the increase or decrease in the percentage of progeny that will be scored as docile (score 1 or 2). Positive EBVs indicate a higher proportion of progeny that will be scored as docile and negative EBVs indicate a lower percentage of progeny being scored as docile.

Domestic Terminal \$ Index: Estimates the genetic differences between animals in net profitability per cow joined for an example commercial crossbred herd (run in a temperate environment)targeting grass finished production fr the domestic trade. Animals are assumed to be pasture grown with finished progeny weighing 4475kg at 18 months, from British Breed cows. All progeny are slaughtered.

Comparing EBVs

The EBVs for Limousins cannot be compared with EBVs for animals of other breeds. They should be compared with the current average EBV for the Limousin breed shown below.

LIMOUSIN Breed Avg. EBVs for 2018 Born Calves																	
	Calving Ease DIR (%)	Calving Ease DTRS (%)	Gestation Length (days)	Birth Wt. (kg)	200 Day Wt (kg)	400 Day Wt (kg)	600 Day Wt (kg)	Mat Cow Wt (kg)	Milk (kg)	Scrotal Size (cm)	Carcase Wt (kg)	Eye Muscle Area (sq cm)	Rib Fat (mm)	Rump Fat (mm)	Retail Beef Yield (%)	IMF (%)	Docility
Breed Avg. EBVs for 2018 Born Calves																	
EBV	+0.5	+0.9	-2.1	+1.5	+19	+33	+45	+48	+7	+1.0	+29	+1.5	+0.0	-0.2	+0.6	+0.0	+41

Accuracies

Accuracies are presented with each EBV and give an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analyzed for that animal and its relatives.

Mid Parent EBVs

EBVs shown for embryo lots are mid parent values.

Disclaimer

The Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither the Australian Limousin Breeders' Society or ABRI oversee or audit the collection of this data.

Health Maryvale is JBAS8 Accredited under the BJD Market Assurance Program. EU accredited. All bulls have been vaccinated twice with 7 in 1, and have also been vaccinated against vibriosis and pesti-virus.

Please note: Whilst every care has been taken to ensure that all of the details presented in this catalogue are accurate and correct we cannot guarantee that the content is free of any errors or omissions.

Bull Management & Taking Delivery of your New Bull

Taking Delivery of your New Bull

To help your new bull or bulls settle into their new home as quickly as possible, the following points may be of some help.

- All Maryvale bulls have been run in large mobs most of their lives, so they've always had plenty of mates around, and have "never" been alone.
- It's a good idea to **have some of your own cattle in the yards** when your new bull/s arrive, a handful of steers, or PTIC cows or even an old bull; just something to keep them company, whilst they survey their new surroundings.
- At Maryvale, we handle our cattle quietly and confidently, we always show our cattle respect, and our cattle respect us. We generally use a motorbikes to yard and handle the bulls. The bulls have not been handled with horses or dogs.
- Handle your new bull/s quietly and with respect and he'll settle into his new home well, and will be easy to handle whenever the need arises.

Bull Management

Maryvale would like to make some suggestions to assist your newly purchased bull to settle into his new environment and also provide some general bull management tips.

SETTLING IN:

- The majority of bulls have been running in a large mob.
- Once unloaded, ensure he has company (eg cow or steer) and plenty of food in front of him, until he is able to be placed into his mob.
- Don't box bulls up too much – the majority of breakdowns are caused in the bull paddock when new bulls are directly added to an existing group of bulls.
- Be aware that it is a new environment to them and some time in the yards may be required.
- Remember the pecking order scenario with other bulls – the newest addition may receive a hard time for a little while. Perhaps run bulls alongside each other for a while before running them together.
- They are used to being treated in a gentle manner and will respond accordingly and should be treated with respect and kindness.

JOINING TIME

- All bulls should be serving ability tested each year to ensure they are sound, prior to going out for mating.
- Once they are out working, please check them regularly to make sure they have not had a breakdown or moved paddocks etc. This practice is essential!
- Always put a back up bull in for a couple of weeks in single mating situations to cover yourself against bull failure.
- Don't mate bulls with horns and polled/dehorned bulls together. Single mating is preferred. If multiple joining, put in bulls that have been together prior to joining and ensure they are roughly the same age, weight, and size.

AFTER JOINING

- Try and split bulls up, particularly if you have a large number of bulls. If finding suitable paddocks is a problem, consider running mature bulls with sheep to allow this split up.
- After taking them out of their joining mobs, provide plenty of feed in front of them. This will ensure minimum fighting.

DELIVERY

Matt 0407 959 837 will work with you on your purchases to arrange suitable and safe delivery wherever in Australia or the world you may be.
